14-17 Feb. Budapest, Hungary

About ICMEP

The 9th International Conference on Manufacturing Engineering and Processes, is an annual conference organized with the intend of being a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in Manufacturing Engineering and Process. This conference provides opportunities for the delegates to exchange new ideas and application experiences face to face, to establish business or research relations and to find global partners for future collaboration.

Topic

Casting and solidification
Coatings and surface engineering
Composite materials
Computer-aided design, manufacturing, and engineering
Environmentally sustainable manufacturing processes and systems
Joining processes
Laser based manufacturing
Manufacturing process planning and scheduling
Materials behavior
Materials forming
Metrology and measurement
Modeling, analysis, and simulation of manufacturing processes
Nanofabrication, nanometrology and applications
Nanomaterials and nanomanufacturing
Nontraditional manufacturing
Physics
Powder metallurgy and ceramic forming
Precision molding processes
Rapid manufacturing technologies
Semiconductor materials manufacturing
Surface, subsurface, and interface phenomena
